## General Notes

---

This report provides data from the 2022 Annual Business Survey (ABS) (data year 2021). The ABS is the primary source of data on research and development of for-profit, nonfarm businesses with one to nine employees operating in the 50 U.S. states and the District of Columbia. The ABS also collects data on innovation, technology, intellectual property, and business owner characteristics of business of all sizes. The ABS is designed to incorporate new content each survey year based on topics of relevance. The 2022 ABS is the fifth year of the ABS. The survey is conducted annually by the Census Bureau for the National Center for Science and Engineering Statistics within the National Science Foundation.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-7504866, Disclosure Review Board (DRB) approval number: CBDRB-FY23-0394).

This report is initially published with a selection of tables containing the core data of the survey. The report will be updated with additional tables as more detailed data become available. In some instances, the initial selection of tables may also be updated from a preliminary version to add further data.

The first set of tables in this report, 1–30, released in October 2023.

The second set of tables in this report, 31–85, released in June 2024.

## Data Tables

---

### Aggregate R&D estimates

Table	Title
-------	-------

1	Annual Business Survey aggregate R&D estimates, by questionnaire reference and employment size, for companies with 1–9 employees in selected industries: 2021
---	---

---

### Total R&D costs

Table	Title
-------	-------

2	Total R&D cost, by selected industry and employment size, for companies with 1–9 employees: 2021
---	--

---

3	Total R&D cost, by selected industry and employment size, for companies with 1–9 employees: 2019, 2020, and 2021
---	--

---

### Domestic R&D performed by the company

Table	Title
-------	-------

4	Domestic R&D performed by the company, by selected industry and employment size, for companies with 1–9 employees: 2021
---	---

---

5	Domestic R&D performed by the company, by selected industry and R&D program size, for companies with 1–9 employees: 2021
---	--

---

6	Domestic R&D costs, by selected industry and type of cost, for companies with 1–9 employees: 2021
---	---

---

7	Domestic R&D performed by the company, by selected industry and source of funds, for companies with 1–9 employees: 2021
---	---

---

8	Domestic R&D performed by the company and funded by the federal government and selected industry, by employment size, for companies with 1–9 employees: 2021
---	--

---

9	Domestic R&D performed by the company, by selected industry and type of R&D, for companies with 1–9 employees: 2021
---	---

---

10	Domestic R&D performed by the company, by selected industry, for companies with 1–9 employees: 2019, 2020, and 2021
----	---

---

11	Domestic sales and domestic R&D performed by the company as a percentage of domestic sales, by selected industry and employment size, for companies with 1–9 employees: 2021
----	--

---

12	Domestic R&D performed by the company, by state and employment size, for companies with 1–9 employees: 2021
----	---

---

Table	Title
-------	-------

13	Domestic R&D performed by the company, by state and source of funds, for companies with 1–9 employees: 2021
----	---

## Domestic R&D employees

Table	Title
-------	-------

14	Domestic R&D employees, by selected industry and employment size, for companies with 1–9 employees: 2021
----	--

15	Domestic R&D employees, by selected industry and sex, for companies with 1–9 employees: 2021
----	--

16	Domestic R&D employees, by selected industry and R&D work activity, for companies with 1–9 employees: 2021
----	--

17	Domestic R&D researchers with PhDs, by selected industry, for companies with 1–9 employees: 2021
----	--

18	Domestic full-time equivalent R&D employees, by selected industry and work activity, for companies with 1–9 employees: 2021
----	---

## Tax credit for research activities

Table	Title
-------	-------

19	Tax credit for research activities, by industry, for companies with R&D expenditures and 1–9 employees: 2021
----	--

## Domestic employees

Table	Title
-------	-------

20	Domestic employees, by selected industry and employment size, for R&D-active companies with 1–9 employees: 2021
----	---

## Product innovation

Table	Title
-------	-------

21	Product innovating companies, by industry: 2019–21
----	--

22	Product innovating companies, by company size: 2019–21
----	--

## Business process innovation

Table	Title
-------	-------

---

23	Business process innovating companies, by industry: 2019–21
----	---

---

24	Business process innovating companies, by company size: 2019–21
----	---

---

## New-to-market product innovation

Table	Title
-------	-------

---

25	Companies with new-to-market product innovation, by industry: 2019–21
----	---

---

26	Companies with new-to-market product innovation, by company size: 2019–21
----	---

---

## New-to-business product innovation

Table	Title
-------	-------

---

27	Companies with new-to-the-business product innovation, by industry: 2019–21
----	---

---

28	Companies with new-to-the-business product innovation, by company size: 2019–21
----	---

---

## Product or business process innovation

Table	Title
-------	-------

---

29	Product or business process innovating companies, by industry: 2019–21
----	--

---

30	Product or business process innovating companies, by company size: 2019–21
----	--

---

## Domestic R&D performed by the company

Table	Title
-------	-------

---

31	Domestic R&D performed by the company, by firm classification of sex of owners and company size, for companies with 1–9 employees: 2021
----	---

---

32	Domestic R&D performed by the company, by firm classification of race and ethnicity of owners and company size, for companies with 1–9 employees: 2021
----	--

---

## Number of domestic employees for companies with 1–9 employees

Table Title

---

33 Domestic employees, by selected industry and company size, for companies with 1–9 employees: 2021

---

## Aggregate sales estimates

Table Title

---

34 Annual business survey aggregate sales estimates, by financial information and company size: 2021

---

## Number of companies

Table Title

---

35 Companies, by company size and industry: 2021

---

## Sales and revenues

Table Title

---

36 Worldwide sales, revenues, and grants, by company size and industry: 2021

---

37 Sales and revenues from U.S. operations, by company size and industry: 2021

---

38 Domestic employees, by company size and industry: 2021

---

## Sources of domestic sales and revenue

Table Title

---

39 Sources of domestic sales and revenue, by industry: 2021

---

40 Sources of domestic sales and revenue, by company size: 2021

---

41 Sources of domestic sales and revenue, by R&D activity, for companies with 1–9 employees in selected industries: 2021

---

## Product innovation

Table Title

---

42 Product innovating companies, by firm classification of sex of owners: 2019–21

---

43 Product innovating companies, by firm classification of race and ethnicity of owners: 2019–21

---

Table	Title
44	Product innovating companies, by state: 2019–21
45	Goods and services innovating companies, by industry: 2019–21
46	Goods and services innovating companies, by company size: 2019–21
47	Product innovating companies, by industry: 2019, 2020, and 2021
48	Product innovating companies, by company size: 2019, 2020, and 2021

## Impact of coronavirus on R&D

Table	Title
49	Changes in R&D due to the coronavirus pandemic, by company size, for R&D performing companies with 1–9 employees in selected industries: 2021
50	Impact of coronavirus pandemic on R&D expenditures, by company size, for R&D performing companies with 1–9 employees in selected industries: 2021
51	In-house R&D on coronavirus pandemic-related R&D projects, by company size, for R&D performing companies with 1–9 employees in selected industries: 2021
52	Impact of coronavirus pandemic on R&D full-time equivalent personnel, by company size, for R&D performing companies with 1–9 employees in selected industries: 2021

## Tax credit for research activities

Table	Title
53	Tax credit for research activities for companies with 1–9 employees, by industry: 2021

## Product or business process innovation

Table	Title
54	Product or business process innovating companies, by firm classification of sex of owners: 2019–21
55	Product or business process innovating companies, by firm classification of race and ethnicity of owners: 2019–21

## Companies performing or funding R&D on select technologies

Table	Title
-------	-------

56	Companies performing or funding R&D on select technologies, by sector: 2021
----	---

57	Companies performing or funding R&D on select technologies, by company size: 2021
----	---

## Companies using select technologies

Table	Title
-------	-------

58	Companies using select technologies, by sector: 2021
----	--

59	Companies using select technologies, by company size: 2021
----	--

## Source of technology capabilities

Table	Title
-------	-------

60	Source of technology capabilities, by industry: 2021
----	--

61	Source of technology capabilities, by company size: 2021
----	--

## Design activities

Table	Title
-------	-------

62	Companies with design activities, by industry: 2021
----	---

63	Companies with design activities, by company size: 2021
----	---

64	Companies that provided resources for design activities, by industry: 2021
----	--

65	Companies that provided resources for design activities, by company size: 2021
----	--

## Intellectual property protection

Table	Title
-------	-------

66	Companies with intellectual property protection methods, by industry: 2021
----	--

67	Companies with intellectual property protection methods, by company size: 2021
----	--

## Activities conducted by domestic or foreign unaffiliated or affiliated companies

Table	Title
68	Activities conducted by domestic unaffiliated companies, by industry: 2021
69	Activities conducted by domestic unaffiliated companies, by company size: 2021
70	Activities conducted by foreign unaffiliated companies, by industry: 2021
71	Activities conducted by foreign unaffiliated companies, by company size: 2021
72	Activities conducted by domestic or foreign unaffiliated companies, by industry: 2021
73	Activities conducted by domestic or foreign unaffiliated companies, by company size: 2021
74	Activities conducted by foreign affiliated companies, by industry: 2021
75	Activities conducted by foreign affiliated companies, by company size: 2021

## Companies and manufacturing activities

Table	Title
76	Companies with manufacturing activities in the United States, by industry: 2021
77	Companies with manufacturing activities in the United States, by company size: 2021
78	Companies with contracted out manufacturing, by contractor company type and industry: 2021
79	Companies with contracted out manufacturing, by contractor company type and company size: 2021
80	Companies with contracted out manufacturing that determined the design of contracted out goods, by industry: 2021
81	Companies with contracted out manufacturing that determined the design of contracted out goods, by company size: 2021
82	Companies manufacturing goods for others, by type of customer, by industry: 2021
83	Companies manufacturing goods for others, by type of customer, by company size: 2021
84	Companies manufacturing goods for others that provided designs or specifications for those goods, by industry: 2021
85	Companies manufacturing goods for others that provided designs or specifications for those goods, by company size: 2021

TABLE 1

**Annual Business Survey aggregate R&D estimates, by questionnaire reference and employment size, for companies with 1–9 employees in selected industries: 2021**

(Thousands of U.S. dollars)

Company and financial information	All companies	1–4 employees	5–9 employees
Number of companies	15,855	9,993	5,861
Total R&D cost	8,131,847	3,659,817	4,472,030
Foreign R&D costs	877,630	489,208	388,422
Domestic R&D costs	7,254,217	3,170,609	4,083,608
Domestic R&D costs for salaries, wages, and fringe benefits	4,036,146	1,660,533	2,375,613
Domestic R&D costs for expensed machinery and equipment (not capitalized)	199,530	78,328	121,202
Domestic R&D costs for materials and supplies	573,007	230,443	342,565
Domestic R&D costs for payments to others for R&D	1,129,548	579,812	549,737
Domestic R&D costs for depreciation on R&D property and equipment	74,926	26,770	48,156
Domestic R&D costs for other costs	1,241,060	594,723	646,336
Domestic R&D performance	6,124,669	2,590,797	3,533,871
Domestic R&D performance paid for by the company	4,550,744	1,980,752	2,569,991
Domestic R&D performance paid for by foreign owner	179,119	59,662	119,457
Domestic R&D performance paid for by another U.S. business	270,888	135,905	134,983
Domestic R&D performance paid for by other businesses located outside the United States	16,580	11,384	5,196
Domestic R&D performance paid for by U.S. university or college	7,685	6,383	1,302
Domestic R&D performance paid for by U.S. nonprofit organization	26,720	11,660	r 15,061
Domestic R&D performance paid for by U.S. federal government	1,004,852	340,324	664,528
Domestic R&D performance paid for by U.S. state or local government	63,157	42,372	20,785
Domestic R&D performance paid for by all other organizations outside the United States	4,923	2,355	r 2,568
Domestic R&D performance for basic research	715,225	329,829	385,395
Domestic R&D performance for applied research	2,221,924	869,487	1,352,437
Domestic R&D performance for development	3,187,520	1,391,481	1,796,039

r = relative standard error &gt; 50%.

**Note(s):**

Detail may not add to total because of rounding. Statistics are representative of companies located in the United States that performed or funded R&D. Selected industries include the 2017 North American Industry Classification System sectors 31, 32, 33, 42, and 51 and industries 5413, 5415, and 5417.

TABLE 31

**Domestic R&D performed by the company, by firm classification of sex of owners and company size, for companies with 1–9 employees: 2021**

(Number and thousands of U.S. dollars)

Sex of owners	All companies		1–4 employees		5–9 employees	
	Companies (number)	Amount	Companies (number)	Amount	Companies (number)	Amount
All companies	15,339	6,124,669	9,611	2,590,797	5,727	3,533,871
Female owned	1,623	527,911	1,067	233,243	555	294,668
Male owned	12,332	4,889,631	7,687	2,091,498	4,644	2,798,133
Equally owned by male and female	1,105	447,748	748	192,297	358	255,451
Unclassifiable	279	259,378	109	73,759	169	185,619

**Note(s):**

Detail may not add to total because of rounding. Statistics are representative of companies located in the United States that performed or funded R&D. Unclassifiable category includes firms that have no owners with a 10% or greater ownership of the stock or equity in the business. Companies are classified according to owner demographics if persons with that demographic characteristic own more than a 50% stake in the company.

TABLE 32

**Domestic R&D performed by the company, by firm classification of race and ethnicity of owners and company size, for companies with 1–9 employees: 2021**

(Number and thousands of U.S. dollars)

Race and ethnicity of owners	All companies		1–4 employees		5–9 employees	
	Companies (number)	Amount	Companies (number)	Amount	Companies (number)	Amount
All companies	15,339	6,124,669	9,611	2,590,797	5,727	3,533,871
Race						
White	11,881	4,574,296	7,435	1,973,782	4,444	2,600,514
Asian	2,657	1,065,869	1,691	439,225	967	626,644
Black or African American	233	71,811	195	45,235	37	26,576
American Indian or Alaska Native	139	76,141	58	7,378	80	68,763
Native Hawaiian or Other Pacific Islander	13	1,881	4	720	9	1,161
Ethnicity						
Hispanic or Latino	456	142,000	275	60,546	181	81,454
Equally Hispanic or Latino and not Hispanic or Latino	121	26,363	112	23,666	8	2,697
Not Hispanic or Latino	14,482	5,696,928	9,115	2,432,826	5,369	3,264,101
Minority status						
Minority	3,437	1,315,999	2,243	578,174	1,194	737,825
Black or African American, American Indian or Alaska Native, or Hispanic or Latino	789	272,077	507	111,114	280	160,963
Equally minority and nonminority	543	249,075	401	127,763	142	121,311
Nonminority	11,082	4,300,217	6,860	1,811,101	4,221	2,489,116
Unclassifiable	279	259,378	109	73,759	169	185,619

r = relative standard error &gt; 50%.

**Note(s):**

Detail may not add to total because of rounding. Companies may be included in one or more race and ethnicity category. Companies classified as “minority” are those companies classified as any race and ethnicity combination other than White and not Hispanic or Latino. Unclassifiable category includes firms that have no owners with a 10% or greater ownership of the stock or equity in the business. Statistics are representative of companies located in the United States that performed or funded R&D. Companies are classified according to owner demographics if persons with that demographic characteristic own more than a 50% stake in the company.

i = > 50% of the estimate is a combination of imputation and reweighting to account for nonresponse; r = relative standard error > 50%.

NAICS = 2017 North American Industry Classification System.

**Note(s):**

Detail across rows may not add to total because of rounding or unavailable NAICS detail for select records beyond the 4-digit industry classification. Industry classification is based on dominant establishment payroll. Detail across columns have been adjusted to add to total. Statistics are representative of companies located in the United States.

TABLE 42

**Product innovating companies, by firm classification of sex of owners: 2019–21**

(Number and percent)

Sex of owners	Companies (number)	Product innovation			
		Number		Percent	
		Yes	No	Yes	No
All companies	4,874,928	459,474	4,415,454	9.4	90.6
Female owned	1,094,826	121,905	972,921	11.1	88.9
Male owned	3,054,668	271,626	2,783,042	8.9	91.1
Equally owned by male and female	695,951	61,893	634,058	8.9	91.1
Unclassifiable	29,483	4,050	25,433	13.7	86.3

**Note(s):**

Detail across rows may not add to total because of rounding. Detail across columns have been adjusted to add to total. Unclassifiable category includes firms that have no owners with a 10% or greater ownership of the stock or equity in the business. Companies are classified according to owner demographics if persons with that demographic characteristic own more than a 50% stake in the company.

National Center for Science and Engineering Statistics and Census Bureau, 2022 Annual Business Survey: Data Year 2021.

TABLE 43

**Product innovating companies, by firm classification of race and ethnicity of owners: 2019–21**

(Number and percent)

Race and ethnicity of owners	Companies (number)	Product innovation			
		Number		Percent	
		Yes	No	Yes	No
All companies	4,874,928	459,474	4,415,454	9.4	90.6
Race					
White	4,166,399	376,259	3,790,140	9.0	91.0
Asian	528,892	61,739	467,153	11.7	88.3
Black or African American	114,570	14,308	100,262	12.5	87.5
American Indian or Alaska Native	42,474	5,209	37,265	12.3	87.7
Native Hawaiian or Other Pacific Islander	7,097	534	6,563	7.5	92.5
Ethnicity					
Hispanic or Latino	314,814	37,051	277,763	11.8	88.2
Equally Hispanic or Latino and not Hispanic or Latino	44,160	5,374	38,786	12.2	87.8
Not Hispanic or Latino	4,486,469	412,999	4,073,470	9.2	90.8
Minority status					
Minority	978,056	114,990	863,066	11.8	88.2
Black or African American, American Indian or Alaska Native, or Hispanic or Latino	445,131	52,765	392,366	11.9	88.1
Equally minority and nonminority	80,198	9,069	71,129	11.3	88.7
Nonminority	3,787,192	331,366	3,455,826	8.7	91.3
Unclassifiable	29,483	4,050	25,433	13.7	86.3

**Note(s):**

Detail across rows may not add to total because of rounding. Detail across columns have been adjusted to add to total. Companies may be included in one or more race and ethnicity category. Companies classified as “minority” are those companies classified as any race and ethnicity combination other than White and not Hispanic or Latino. Unclassifiable category includes firms that have no owners with a 10% or greater ownership of the stock or equity in the business. Statistics are representative of companies located in the United States. Companies are classified according to owner demographics if persons with that demographic characteristic own more than a 50% stake in the company.

TABLE 49

**Changes in R&D due to the coronavirus pandemic, by company size, for R&D performing companies with 1–9 employees in selected industries: 2021**

(Percent)

Employment size	All R&D performing companies (number)	New R&D project were started	Existing R&D projects were canceled	Existing R&D projects were disrupted
Micro companies	15,339	37.3	12.9	49.6
1–4	9,611	35.3	12.2	47.7
5–9	5,727	40.6	14.1	52.6

**Note(s):**

Percentages are from a "check all that apply" question. Only companies in the following North American Industrial Classification System sectors and industries are included in this table: 31–33, 42, 51, 5413, 5415, and 5417. Industry classification is based on dominant establishment payroll. Statistics are representative of companies located in the United States.

TABLE 54

**Product or business process innovating companies, by firm classification of sex of owners: 2019–21**

(Number and percent)

Sex of owners	Companies (number)	Product or business process innovation			
		Number		Percent	
		Yes	No	Yes	No
All companies	4,874,928	1,310,146	3,564,782	26.9	73.1
Female owned	1,094,826	331,403	763,423	30.3	69.7
Male owned	3,054,668	793,721	2,260,947	26.0	74.0
Equally owned by male and female	695,951	175,430	520,521	25.2	74.8
Unclassifiable	29,483	9,592	19,891	32.5	67.5

**Note(s):**

Detail across rows may not add to total because of rounding. Detail across columns have been adjusted to add to total. Unclassifiable category includes firms that have no owners with a 10% or greater ownership of the stock or equity in the business. Statistics are representative of companies located in the United States. Companies are classified according to owner demographics if persons with that demographic characteristic own more than a 50% stake in the company.

TABLE 55

**Product or business process innovating companies, by firm classification of race and ethnicity of owners: 2019–21**

(Number and percent)

Race and ethnicity of owners	Companies (number)	Product or business process innovation			
		Number		Percent	
		Yes	No	Yes	No
All companies	4,874,928	1,310,146	3,564,782	26.9	73.1
Race					
White	4,166,399	1,088,355	3,078,044	26.1	73.9
Asian	528,892	163,382	365,510	30.9	69.1
Black or African American	114,570	40,388	74,182	35.3	64.7
American Indian or Alaska Native	42,474	12,858	29,616	30.3	69.7
Native Hawaiian or Other Pacific Islander	7,097	1,744	5,353	24.6	75.4
Ethnicity					
Hispanic or Latino	314,814	104,756	210,058	33.3	66.7
Equally Hispanic or Latino and not Hispanic or Latino	44,160	13,335	30,825	30.2	69.8
Not Hispanic or Latino	4,486,469	1,182,461	3,304,008	26.4	73.6
Minority status					
Minority	978,056	312,524	665,532	32.0	68.0
Black or African American, American Indian or Alaska Native, or Hispanic or Latino	445,131	148,489	296,642	33.4	66.6
Equally minority and nonminority	80,198	23,627	56,571	29.5	70.5
Nonminority	3,787,192	964,403	2,822,789	25.5	74.5
Unclassifiable	29,483	9,592	19,891	32.5	67.5

**Note(s):**

Detail across rows may not add to total because of rounding. Detail across columns have been adjusted to add to total. Companies may be included in one or more race and ethnicity category. Companies classified as “minority” are those companies classified as any race and ethnicity combination other than White and not Hispanic or Latino. Unclassifiable category includes firms that have no owners with a 10% or greater ownership of the stock or equity in the business. Statistics are representative of companies located in the United States. Companies are classified according to owner demographics if persons with that demographic characteristic own more than a 50% stake in the company.

## Technical Notes

---

### Survey Overview (2022 Survey Cycle: Data Year 2021)

*Purpose.* The Annual Business Survey (ABS) provides information on selected economic and demographic characteristics for businesses and business owners by sex, ethnicity, race, and veteran status. Further, the survey measures research and development (R&D) for microbusinesses, business topics such as innovation and technology, and other business characteristics. The ABS is conducted jointly by the Census Bureau and the National Center for Science and Engineering Statistics (NCSES) within the National Science Foundation (NSF). The ABS replaces the quinquennial Survey of Business Owners for employer businesses, the Annual Survey of Entrepreneurs, the Business R&D and Innovation for Microbusinesses Survey, and the Innovation section of the Business R&D and Innovation Survey.

The ABS is designed to incorporate new content each survey year based on topics of relevance. For the 2022 ABS, content includes company information, owner characteristics, research activities at nonprofit organizations, R&D, technology, innovation, financing, and management practices. R&D data are collected on the ABS for businesses with a W-2 employment range between one and nine employees.

*Data collection authority.* Title 13, U.S. Code, Sections 8(b), 131, and 182; Title 42, U.S. Code, Sections 1861–76 (NSF Act of 1950, as amended); and Section 505 within the America COMPETES Reauthorization Act of 2010, authorize this collection. Sections 224 and 225 of Title 13 require mandatory response. Office of Management and Budget (OMB) No. 0607-1004.

*Survey sponsor.* NCSES within NSF.

*Survey collection and tabulation agent.* The survey is conducted annually by the Census Bureau in accordance with an interagency agreement with NCSES within NSF.

### Key Survey Information

*Frequency.* Annual.

*Initial survey year.* Calendar year 2017; for innovation, the reference period was 2015–17.

*Reference period.* Calendar year 2021; for innovation, the reference period was 2019–21.

*Response unit.* Nonfarm businesses in the United States.

*Sample or census.* Sample.

*Population size.* A total of 4.9 million employer firms; approximately 505,000 firms with one to nine employees and in North American Industry Classification System (NAICS) industries 31–33 (manufacturing), 42 (wholesale trade), 51 (information), 5413 (architectural, engineering, and related services), 5415 (computer systems design and related services), or 5417 (scientific research and development services) were in scope for the R&D module.

*Sample size.* 300,000 employer businesses.

## Survey Design

*Target population.* Included are all nonfarm businesses filing Internal Revenue Service (IRS) tax forms as individual proprietorships, partnerships, or any type of corporation and with receipts of \$1,000 or more. The target population included only companies that had paid employees according to the IRS Form 941 that covered 12 March 2022, are classified in an in-scope NAICS industry, were physically located in the United States, and were in business at the end of calendar year 2022. The ABS covers firms with paid employees only. The ABS is conducted on a company or firm basis rather than an establishment basis.

*Sampling frame.* The sampling universe was constructed from the final 2020 Business Register. The Business Register is the Census Bureau's comprehensive database of U.S. businesses. Business Register data are compiled from a combination of business tax returns, data collected from the economic census, and data from other Census Bureau surveys. The Business Register includes sole proprietorships, partnerships, and corporations reporting business activity to the IRS on any one of the following IRS tax forms: 1040 (Schedule C), "Profit or Loss from Business" (Sole Proprietorship); 1065, "U.S. Return of Partnership Income"; 941, "Employer's Quarterly Federal Tax Return"; 944, "Employer's Annual Federal Tax Return"; or any one of the 1120 corporate tax forms.

The Business Register contains establishments that are out of scope for the ABS sample. These establishments are removed from the sampling universe. They include the following:

- Establishments engaged in the following NAICS industries:
  - 110000, 111, or 112 - Agriculture production
  - 482 - Railroads
  - 491 - U.S. Postal Service
  - 521 - Monetary authorities—central bank
  - 525 - Funds, trusts, and other financial vehicles
  - 813 - Religious, grantmaking, civic, professional, and similar organizations
  - 814 - Private households
  - 92 - Public administration
- Unclassified with legal form of organization as tax exempt or unknown
- Establishments located in American Samoa, Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands
- Establishments belonging to foreign entities
- Government establishments
- Establishments with zero payroll and zero employment
- Establishments identified as out of business during prior year data review
- Single-unit establishments modeled as likely to be out of business using administrative data from the most recent monthly Business Register data sets

Information on industry classification, receipts, payroll, and employment was extracted from the Business Register during the frame construction.

The sample is also designed to estimate demographic characteristics of the business owners. To efficiently sample for demographic characteristics, a variety of sources of information are used to estimate the likelihood that a business is a woman- or minority-owned business. Administrative sources include the Decennial Census, the American Community Survey (ACS), and the Numident file, which is the Social Security Administration's comprehensive database of information from Social Security applications. Individual business owners are identified through IRS K-1 filings for partnerships and corporations and from the Business Register for sole proprietorships. The owners are matched to the 2000 and 2010 Decennial Censuses to get race, sex, and ethnicity data; to the 2000–20 ACS; and to the Numident file (in that order) through a Protected Identification Key. Country of birth is also identified through the linkages to the ACS or Numident data. Each firm is then placed in one of the following eight strata describing characteristics of business owners for sampling: American Indian or Alaska Native, Asian, Black or African American, Hispanic, non-Hispanic White men, Native Hawaiian and Other Pacific Islander, publicly owned, and women owned. Businesses are assigned to one and only one stratum, with priority given to the less common race or ethnicity groups.

*Sample design.* The ABS frame is stratified by state, expected owner race or ethnicity, and industry and is systematically sampled within each stratum. A standard type of estimation for stratified systematic sampling is used. Large companies were selected with certainty based on volume of sales, payroll, or number of paid employees. Certainty cases have a selection probability of 1, a sampling weight of 1, and represent only themselves. Specifically for the 2022 ABS, firms were selected with certainty based on the following criteria:

- Firms in NAICS 5415 or 5417 with expected employment of fewer than 10 employees that reported at least \$500,000 in R&D expenses in a prior year ABS,
- Firms in NAICS 5413, 31, 32, 33, 42, or 51 with expected employment of fewer than 10 employees that reported at least \$50,000 in R&D expenses in a prior year ABS,
- Firms with more than 500 employees, or
- Firms larger than stratum-specific payroll and receipt cutoffs.

The certainty cutoffs vary by sampling stratum, and each stratum is sampled at varying rates, depending on the number and size of firms in a particular stratum.

The remaining frame is subjected to stratified systematic random sampling. Sampling rates vary by strata and are determined by the following calculations. Note that a systematic sample uses take rate to sample, and the sampling rate is  $1/\text{take rate}$ .

The ABS sample consisted of 300,000 businesses. There were 46,000 selected with certainty. The certainty portion of the sample consisted of

- 5,000 with sufficient R&D expenses in previous cycles of the ABS,
- 17,000 with 500 or more employees,
- 16,000 with payroll above the stratum cutoff, and
- 8,000 with receipts above the stratum cutoff. (Note that payroll cutoffs are applied first so cases above both cutoffs appear in payroll count.)

The remaining 254,000 noncertainty cases were selected using the systematic stratified random sample selection. The maximum sample weight was 40.

## Data Collection and Processing Methods

*Data collection.* Prior to mailing the survey, certain businesses selected were determined to be out of scope and were not contacted. The survey was mailed to 300,000 employer businesses in July 2022. Businesses were sent a letter informing them of their requirement to report. The letter also provided instructions on how to access the survey and submit online. There were three mail follow-ups conducted to increase response. Additionally, the Census Bureau conducted e-mail follow-ups to respondents who entered the electronic system but did not submit the questionnaire. The collection period closed in January 2023.

*Mode.* The 2022 ABS was collected using a Web-based survey instrument.

*Check-in rate.* The check-in rate is defined as the unweighted number of surveys that were submitted online by in-scope companies, divided by the unweighted total number of all in-scope companies in the sample. Response to individual questions did not factor into this metric. At the close of the collection period in January 2023, there were 184,000 responses submitted (62% of the sample).

There were an additional 1,900 businesses that contacted the Census Bureau to indicate that the business was no longer in operation or had been sold for the reference year via the call center.

Businesses selected to report R&D represented 39% of those mailed. Of the businesses mailed and selected to report R&D, 71,000 businesses (or 65%) submitted responses.

*Unit response rate (URR).* The URR is the unweighted number of responding companies for the survey. For the ABS, *response* is defined as a company providing the number of owners, number of paid owners, and number of employees or a company responding that it ceased operations prior to 2021.

For the ABS, the URR was 67.0%. The URR for businesses eligible to report the R&D module was 70.3%.

*Item response rates (IRR).* The 2022 ABS collected data on approximately 650 variables, and the distribution of values reported by sample companies is highly skewed. Thus, rather than report unweighted item response rates, total quantity response rates are calculated, which are based on weighted data. The survey skip patterns vary for respondents; therefore, it can be impossible to know an exact denominator for item response calculations.

*Total quantity response rate (TQRR).* For a given published estimate other than count or ratio estimates, TQRR is the percentage of the weighted estimate based on data that were reported by units in the sample or on data that were obtained from other sources and were determined to be equivalent in quality to reported data and weighted only by sampling but not nonresponse weights. The TQRR for total sales in the United States in 2020 was 72.6%.

*Total quantity nonresponse rate (TQNR).* For a given published estimate, TQNR, defined as 100% minus TQRR, is calculated for each tabulation cell from the ABS, except for cells that contain count or ratio estimates. TQNR measures the combined effect of the procedures used to handle unit and item nonresponse on the weighted ABS estimate. Detailed imputation rates are available on request.

*Data editing.* Prior to tabulating the data, response data were reviewed and edited to correct reporting errors. R&D data were tabulated for records reporting \$50,000 or more in R&D expenditures.

Additionally, R&D data were only tabbed for records classified in the following NAICS industries:

- 31–33 - Manufacturing
- 42 - Wholesale trade
- 51 - Information
- 5413 - Architectural, engineering, and related services

- 5415 - Computer systems design and related services
- 5417 - Scientific research and development services

Survey analysts reviewed the R&D reported by the survey respondents. Research was done by evaluating the reported business descriptions, reported R&D-to-sales ratio, and company website information. The majority of corrections involved false-positive reports or data reported using incorrect units (such as whole dollars instead of thousands of dollars). For NAICS industries 5415 and 5417, it is difficult to differentiate R&D from other technical work based solely on company website information. Due to this difficulty and the large number of companies sampled in these industries, it was not feasible to review each case individually; thus, relatively few corrections were made for false-positive reports. All cases were reviewed in these industries that had greater than \$50,000 in R&D expenses.

Additional data errors were detected and corrected through mass corrections and an automated data edit system designed to review the data for reasonableness and consistency. The editing process interactively performed corrections by using standard procedures to fix detectable errors. Quality control techniques were used to verify that operating procedures were carried out as specified.

*Unit nonresponse.* Unit nonresponse is handled by adjusting weighted reported data as follows. Each company's sampling weight is multiplied by a nonresponse adjustment factor. To calculate the adjustment factors, each company in the sample that is eligible for tabulation is assigned to one (and only one) adjustment cell. The adjustment cells are based on employment size and NAICS sector. For employment size, there are five categories: 1–4 employees, 5–9 employees, 10–49 employees, 50–249 employees, and 250 or more employees. For a given adjustment cell, the nonresponse adjustment factor is the ratio of the sum of the sampling weights for all companies in the cell to the sum of the sampling weights for all companies in the cell with reported data. The nonresponse adjustment factor for adjustment cell  $h$  was calculated as follows:

$$NAF_h = \frac{\sum_{r+nr} wgt}{\sum_r wgt},$$

where

$r$  is the respondents (partial and complete),

$nr$  is the nonrespondents,

$wgt$  is the original sampling weight value,

$h$  is the nonresponse adjustment cell, and

$NAF_h$  is the nonresponse adjust factor for cell  $h$ .

For the nonresponse adjustment, a business is considered a respondent if it provided the number of owners, number of paid owners, and number of employees. Businesses that responded they ceased operations prior to 2021 are excluded from nonresponse adjustments as out of scope.

*Tabulation.* Although as many firms as possible were identified as out of scope during sampling, additional out-of-scope firms were identified with either response or updated administrative data not available at the time of sampling. These 33,000 firms were removed for tabulations and include

- Firms reporting zero employment,
- Firms that responded as having gone out of business before 2021,
- Nonprofit organizations,

- Firms that responded as being owned by a domestic parent company, and
- Firms with unclassified NAICS industry.

*Industry classification.* The industry classifications of firms are based on the **2017 NAICS** (<https://www.census.gov/naics/>). Firms with more than one domestic establishment are assigned a single industry classification using a hierarchical system based on the largest payroll sector, largest payroll 3-digit NAICS (within the largest sector), largest payroll 4-digit NAICS (within the largest 3-digit), and largest payroll 6-digit NAICS (within the largest 4-digit). For tabulation, industry classification was based on administrative data for 2017.

*Geography.* Firms with establishments operating in more than one state are tabulated as unclassified geography and counted only once in state and national totals.

*Variance estimation.* The ABS uses the delete-a-group jackknife variance estimator. Note that certainty cases do not contribute to the sampling variance. The delete-a-group jackknife variance estimator requires that every sampling stratum contains at least two sampled firms. Sampling strata that do not meet this requirement are collapsed as needed to create a new set of variance estimation strata that satisfies this requirement.

Data tables showing relative standard errors are available on request from the Survey Manager.

## Survey Quality Measures

The estimates produced from the ABS are subject to both sampling and nonsampling errors.

*Sampling error.* The sampling error is described above in the variance estimation section.

*Coverage error.* Coverage error occurs when the frame fails to completely enumerate the population of interest. There can be both *undercoverage error*, where units are not included in the frame, and *overcoverage error*, where units included in the frame are actually out of scope for the population of interest. The ABS uses the prior-year Business Register to construct the frame, so any changes in businesses that would change the inclusion or exclusion of the business to the survey scope could be sources of coverage error. Prior to tabulation, survey units' information is updated with the most recently available Business Register data to mitigate this source of error.

*Nonsampling error.* All surveys and censuses have nonsampling errors. Nonsampling errors are attributable to various sources, such as the inability to obtain information for all cases in the universe, imputation for missing data, data errors and biases, mistakes in recording or keying data, errors in collection or processing, and coverage problems.

Although explicit measures of the effects of these nonsampling errors are not available, adjustments are made to the published relative standard errors to account for errors associated with imputation of missing data. It is believed that most of the important operational and data errors were detected and corrected through an automated data edit designed to review the data for reasonableness and consistency. Quality control techniques were used to verify that operating procedures were carried out as specified.

*Measurement error.* The most common source of measurement error was reporting in different units (e.g., reporting whole dollars rather than thousands of dollars). Variations in respondent interpretations of the definitions of R&D activities are of particular concern, and error can occur when respondents do not report dollar amounts correctly. Little public information exists for most of the small businesses surveyed by the ABS, so it is difficult to determine whether companies are reporting R&D that satisfies the survey's definitions, particularly where the development of software and Internet applications are concerned. Although no metric of measurement error is produced, ongoing efforts to minimize measurement error include questionnaire pretesting, improvement of questionnaire wording and format, inclusion of more cues and examples in the questionnaire instructions, telephone interviews and consultations with respondents, and post-survey evaluations.

## Data Comparability

Some estimates from the 2022 ABS may not be directly comparable to prior ABS results due to changes in survey methodology. Sources of possible incomparability include changes to questionnaire wording and instructions, changes to data editing and tabulation, and changes to imputation and nonresponse adjustments.

*Changes in survey coverage and population.* There were no changes to survey coverage and population for reference year 2021 (ABS 2022).

*Changes to questionnaire wording and instructions.* The survey section that collected information on R&D from businesses (section D) had nearly identical question wording and instructions for both the ABS 2021 and the ABS 2020 questionnaires. The 2022 ABS collected additional detail from businesses on the location of R&D performance and explicitly highlighted the concept of “domestic R&D performance.” For the 2022 ABS detailed questions about R&D expenditures (types of costs, funding sources, and R&D categories) were tied to domestic R&D performance (a subset of total R&D costs), whereas previous ABS questionnaires asked similar questions tied to total R&D costs.

The following are survey changes in the questionnaire from ABS 2021 to ABS 2022; question number references are in reference to the ABS 2022:

- New question: B.15 Owner Disability (added for all owners)
- New question: C.11 Research Performance by Type of Cost
- New questions: C.17–C.19 Additional questions on Capital Expenditures for Research Activities at Nonprofit Organizations
- New questions: D.10–D.12 Additional questions on Capital Expenditures for businesses with 1–9 employees
- New question: D.18 State Tax Credit for Research Activities
- New section E: Goods, Services, and Business Processes and Technology
- New section F: Design and Intellectual Property
- New section G: Domestic and Foreign Transactions
- Revised section H: Coronavirus Pandemic Impact on Research and Development and Business Activities
  - Removed question: H.5 Outsourcing R&D Expenditures Due to the Coronavirus Pandemic
  - New question: H.5 Changing R&D Payment Due to the Coronavirus Pandemic
  - New question: H.6 Effect of Coronavirus Pandemic on Business Sales
  - New question: H.7 Financial Health of the Business
  - New question: H.8 Outstanding Debt for the Business
  - New question: H.9 Level of Operations During the Coronavirus Pandemic

*Changes in reporting procedures or classification.* There were no changes to reporting procedures or classification for data year 2021.

*Changes to data editing and tabulation.* For data collected in the R&D section of the ABS, every response with \$50,000 or more in R&D costs was reviewed for reasonableness. All positive R&D cases were reviewed in industries with high rates of false-positive reports. Outside of the review for potential false-positive R&D cases, the editing of R&D data was performed similarly in 2020 and 2021. There have been no major changes to the edits from year to year.

Data collected in the innovation section of the ABS were edited similarly in 2018 and 2019, but the estimates for product innovation were tabulated differently. For 2017, a business must have responded positively to both the product innovation question and the subsequent business product innovation question (new to market or new to business) to be considered a product innovator. For 2021 and 2022, only a positive response to the question regarding new or improved goods or services was required to be tabulated as a product innovator.

*Changes in imputation methods.* In 2019, a change was made in how item nonresponse is treated in the ABS. Item nonresponse occurs when a company responds to the survey but leaves some items blank. In 2018, item nonresponse was treated using a combination of mode and donor imputation. For 2019 and future years (including 2021), no imputation was performed to treat item nonresponse, and missing items were included as no or zero in the estimates. For most of the estimates in 2019 (91%), this change in methods did not yield a change in the estimates. For an additional 9% of estimates, there was a difference in the estimate; the difference, however, was not statistically significant. In 2021, the imputation method was updated to exclude out-of-scope firms as donors and recipients. In previous ABS years, all sampled firms were included in imputation and out-of-scope firms were later removed.

*Changes in collection methods.* During the 2022 ABS collection period, a single letter was mailed to respondents using U.S. Postal Service Priority Mail. For the 2022 ABS, the third follow-up used First Class Mail.

## Definitions

- *Affiliated (company or business).* An entity that is owned 10% or more (based on voting interest or an equivalent interest) directly or indirectly by your company.
- *Business processes.* Business process includes the following: (1) methods for producing goods or providing services, (2) distribution and logistics, (3) marketing and sales, (4) information and communication systems, (5) administration and management activities, and (6) product and business process development (including activities to identify, develop, or adapt products or a firm's processes).
- *Core production activity.* This term refers to your primary business activities. For manufacturing companies, core production typically involves production of physical goods. For service companies and other companies, core production refers to the main services or activities provided by your business, such as information and communications technology services, marketing services.
- *Domestic or U.S.-located.* Refers to a location in any of the U.S. 50 states and the District of Columbia.
- *Employment.* Paid employment consists of full- and part-time employees, including salaried officers and executives of corporations who were on the payroll in the pay period including March 12. Included are employees on sick leave, holidays, and vacations; not included are proprietors and partners of unincorporated businesses.
- *Ethnicity.* Based on OMB's guidance, there are two minimum categories for ethnicity: Hispanic or Latino and Not Hispanic or Latino. OMB considers race and Hispanic origin to be two separate and distinct concepts. Hispanics and Latinos may be of any race.
- *Exported goods.* Value of goods, including the value of equipment, supplies, materials, etc. This should equal the amounts reported in the Automated Export System's Electronic Export Information filed with U.S. Customs and Border Protection plus the cost of transporting the goods to customers located in foreign destinations (i.e., outside the United States).
- *Exported services.* An exported service is a service-related product (i.e., services performed, including digital service, license agreement) that is sold or transferred to, or performed for, customers (individual, government, business establishment, etc.) located in foreign destinations (i.e., outside the United States).
- *Firm.* A business organization or entity consisting of one or more domestic establishment locations under common ownership or control.

- *Foreign affiliate*. A foreign affiliate is an entity located outside the United States that is owned at least 10% (based on voting interest or an equivalent interest) directly or indirectly by the U.S. reporter.
- *Foreign parent (of a U.S.-located business)*. The first entity outside the United States in an affiliate's ownership chain that has a direct or indirect investment interest of more than 50% of the affiliate's voting securities.
- *Goods*. Usually a tangible object (such as smartphone, furniture, or packaged software) but also includes digital goods (such as downloadable software, music, and film). Exclude the simple resale of new goods and changes of a solely aesthetic nature.
- *Imported goods*. The value of goods purchased from customers located in foreign destinations (i.e., outside the United States) as indicated in import declarations filed with the U.S. Customs and Border Protection.
- *Imported services*. An imported service is a service-related product (i.e., service performed, including digital service, license agreement) that is purchased from customers located in foreign destinations (i.e., outside the United States).
- *Innovation*. A business innovation is a new or improved product or business process (or combination thereof) that differs significantly from the firm's previous products or business processes and that has been introduced on the market or brought into use by the firm.
- *Intellectual property*. Includes patents, processes, and trade secrets; books and music; trademarks; recorded performances and events, such as radio and television programs and motion pictures; broadcast and recorded live performances and events and their content; general use computer software; franchise fees; and other (e.g., digital media).
- *Noise infusion*. A method of disclosure avoidance in which values are perturbed prior to tabulation by applying a random noise multiplier to the magnitude data, such as the sales and receipts for all firms. Disclosure protection is accomplished in a manner that causes the vast majority of cell values to be perturbed by, at most, a few percentage points.
- *North American Industry Classification System (NAICS)*. NAICS is the standard used by federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. This system is used by the United States, Canada, and Mexico.
- *Race*. The data on race were derived from answers to the race question. Race data are collected in accordance with the guidelines provided by OMB, and these data are based on self-identification. The racial categories included in the questionnaire generally reflect a social definition of race recognized in this country and are not an attempt to define race biologically, anthropologically, or genetically. In addition, it is recognized that the categories of the race question include race and national origin or sociocultural groups. OMB requires that race data be collected for a minimum of five groups: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander. Respondents may report more than one race.
- *Receipts*. Includes the total sales, shipments, receipts, revenue, or grants for domestic operations, excluding foreign subsidiaries.
- *Research and development (R&D)*. R&D is planned, creative work aimed at discovering new knowledge or devising new applications of available knowledge. This includes basic research, applied research, and development (see definitions below). R&D includes both direct costs, such as salaries of researchers, and administrative and overhead costs clearly associated with the company's R&D. However, R&D does not include expenditures for routine product testing, quality control, and technical services unless they are an integral part of an R&D project. R&D also does not include market research; efficiency surveys or management studies; literary, artistic, or historical projects, such as films, music, or books and other publications; and prospecting or exploration for natural resources.
  - *Basic research*. Activities aimed at acquiring new knowledge or understanding without specific immediate commercial applications or uses.

- *Applied research*. Activities aimed at solving a specific problem or meeting a specific commercial objective.
- *Development*. Systematic work, drawing on research and practical experience and resulting in additional knowledge, which is directed to producing new products or processes or to improving existing products or processes.
- R&D activity in software includes
  - Software development or improvement activities that expand scientific or technological knowledge
  - Construction of new theories and algorithms in the field of computer science
- R&D activity in software excludes
  - Software development that does not depend on a scientific or technological advance, such as
    - Supporting or adapting existing systems,
    - Adding functionality to existing application programs,
    - Routine debugging of existing systems and software, and
    - Creation of new software based on known methods and applications.
  - Conversion or translation of existing software and software languages; and
  - Adaptation of a product to a specific client, unless knowledge that significantly improved the base program was added in that process.
- *Services*. Intangible activities, such as retailing, insurance, educational courses, air travel, consulting, etc.; also includes digital services. (Exclude the simple resale of new services.)
- *Sex*. For the purposes of the ABS, sex refers to a person's biological sex. The sex question wording very specifically intends to capture a person's biological sex and not gender.
- *Unaffiliated (company or business)*. Entity that is owned less than 10%, directly or indirectly, by your company (i.e., independent contractors and suppliers).
- *Worldwide sales*. Worldwide and domestic sales and operating revenues, including grants.

Unclassified	00	18,000	4,900	4,400	400

NAICS = 2017 North American Industry Classification System.

<sup>a</sup> Estimates of the number of companies in the target population are based on the original sampling frame that was created to select the 2021 Annual Business Survey.

**Note(s):**

Certainities were companies with a probability of selection of one because they had previously reported R&D costs, 500 or more employees, or high payroll or receipts defined by stratum specific cutoffs. Noncertainties are companies with a probability of selection of less than 1.

TABLE A-2

**Response measures: 2021**

(Percent)

Measure	2021
Check-in rate <sup>a</sup>	61.5
Response rate (unweighted) <sup>b</sup>	67.0

<sup>a</sup> The number of survey responses from sampled companies divided by the total number of companies in the sample. Note this includes companies who contacted the Census Bureau to indicate they were out of business and companies who were later determined to be in-active or otherwise out of scope for tabulations.

<sup>b</sup> The number of active and in-scope companies responding to the number of owners and number of W-2 employees, divided by the total number of in-scope and active companies in the sample.

TABLE A-3

## Unit response rates, by industry: 2021

(Number)

Industry	NAICS code	In-scope units <sup>a</sup>	Reporting units that met the response criteria (%)
All industries	11, 21–23, 31–33, 42–81, 00	267,000	67
Manufacturing industries	31–33	44,000	68
Food	311	4,300	63
Beverage and tobacco products	312	2,400	71
Textile, apparel, and leather products	313–16	2,300	61
Wood products	321	2,200	68
Paper	322	500	60
Printing and related support activities	323	3,500	69
Petroleum and coal products	324	150	60
Chemicals	325	2,800	68
Pesticide, fertilizer, and other agricultural chemical	3253	150	67
Pharmaceuticals and medicines	3254	900	61
Soap, cleaning compound, and toilet preparation	3256	550	73
Other chemicals	other 325	1,200	67
Plastic and rubber products	326	1,900	68
Nonmetallic mineral products	327	2,000	65
Primary metals	331	800	69
Fabricated metal products	332	5,300	72
Machinery	333	2,900	72
Computer and electronic products	334	3,200	69
Communications equipment	3342	350	71
Semiconductor and other electronic components	3344	1,000	70
Navigational, measuring, and control instruments	3345	1,300	73
Other computer and electronic products	other 334	500	70
Electrical equipment, appliances, and components	335	1,200	71
Transportation equipment	336	2,400	67
Automobiles, bodies, trailers, and parts	3361–63	1,300	69
Aerospace products and parts	3364	550	73
Other transportation	other 336	550	64
Furniture and related products	337	2,500	68
Miscellaneous manufacturing	339	3,800	68
Medical equipment and supplies	3391	1,500	67
Other miscellaneous manufacturing	3399	2,300	70
Nonmanufacturing industries	11, 21–23, 42–81	223,000	67
Agriculture, forestry, fishing and hunting	11	700	64
Mining, extraction, and support activities	21	2,300	65

TABLE A-3

## Unit response rates, by industry: 2021

(Number)

Industry	NAICS code	In-scope units <sup>a</sup>	Reporting units that met the response criteria (%)
Utilities	22	1,000	75
Construction	23	21,000	67
Wholesale trade	42	15,500	68
Retail trade	44-45	20,000	63
Transportation and warehousing	48-49	12,000	60
Information	51	13,500	68
Publishing	511	4,400	68
Newspaper, periodical, book, and directory publishers	5111	2,000	70
Software publishers	5112	2,400	67
Telecommunications	517	2,500	52
Data processing, hosting, and related services	518	2,400	71
Other information	other 51	4,500	71
Finance and insurance	52	7,200	71
Real estate and rental and leasing	53	9,700	67
Lessors of nonfinancial intangible assets (except copyrighted works)	533	80	63
Other real estate and rental and leasing	other 53	9,600	68
Professional, scientific, and technical services	54	52,500	74
Legal services	5411	7,300	75
Accounting, tax preparation, bookkeeping, and payroll services	5412	4,900	78
Architectural, engineering, and related services	5413	9,800	80
Specialized design services	5414	1,300	77
Computer and electronic products	5415	8,800	72
Management, scientific, and technical consulting services	5416	7,700	71
Scientific research and development services	5417	5,100	71
Advertising, public relations, and related services	5418	4,900	69
Other professional, scientific, and technical services	5419	2,700	74
Management of companies and enterprises	55	100	70
Administrative and support and waste management and remediation services	56	12,000	64
Educational services	61	2,100	67
Health care and social assistance	62	20,000	68
Health care services	621-23	17,000	71
Social assistance	624	3,000	60
Arts, entertainment, and recreation	71	3,300	70
Accommodation and food services	72	17,500	55
Other services	81	11,500	63

NAICS = 2017 North American Industry Classification System.

<sup>a</sup> In-scope units are determined using response data and final frame data after all data have been processed.

<sup>b</sup> Reporting units were considered to have fulfilled the response criteria if they provided the number of owners and number of W-2 employees.

Audrey E. Kindlon of the National Center for Science and Engineering Statistics (NCSES) developed and coordinated this report under the guidance of Amber Levanon Seligson, NCSES Program Director, and under the leadership of Emilda B. Rivers, NCSES Director; Christina Freyman, NCSES Deputy Director; and John Finamore, NCSES Chief Statistician. In partnership with NCSES, the Census Bureau conducted the survey and prepared the tables. NCSES staff members who made significant contributions include Gary Anderson, Jock Black, and Timothy Wojan.

The Census Bureau, under National Science Foundation interagency agreement number NCSE-1748418, collected, processed, evaluated, and tabulated the data for this report. The Annual Business Survey is conducted within the Economic Directorate of the Census Bureau under the direction of Nick Orsini, Associate Director for Economic Programs, and Stephanie Studds, Assistant Director for Economic Programs.

The data were prepared in the Economic Reimbursable Surveys Division under the direction of Kevin Deardorff, Division Chief, and Aneta Erdie, Assistant Division Chief. This work was performed under the supervision of Patrice Hall, assisted by John Clark, Lakitquana Leal, and Gail White, with staff assistance from Concepcion Arenas Alvarez, Ahmad Bakhshi, Elaine Emanuel, Mary Frauenfelder, Aaron Finkle, Samantha Hernandez, James Jarzabkowski, Jessica Welch, and Tesfay Weldu. Additional support, including table creation and subject matter expertise, was provided by Brandon Shackelford.

Mathematical and statistical techniques were provided by the Economic Statistical Methods Division under the direction of James Hunt, Assistant Division Chief. This work was performed under the supervision of Roberta Kurec, assisted by Sandra Peterson, and Dhanapati Khatiwoda, with staff support from Taylor Beebe, Alexandra Abzún Cadenas, Charles Champion, and Daniel Cordes.

Data collection procedures and operations were provided by the Economic Management Division under the direction of Lisa Donaldson, Division Chief, and Michelle Karlsson, Assistant Division Chief. The staff of the National Processing Center performed mailout preparation, respondent assistance, and correspondence processing. Project management support was provided by Laura Hardesty and Aja Madison.

Development and coordination of the computer processing system was provided by the Economic Application Division under the direction of Sumit Khaneja, Division Chief and Olajumoke Oyewole, Assistant Division Chief. This work was performed by Marilyn Balogh, Michael Feldman, David Gonzalez, Chakravarthy Sharad, and Joseph Talbot.
